TYPE 1002FP
SEMIAUTOMATIC BAG CLOSING MACHINE

The 1002FP features a motorized printer that is actuated when the closed bag is removed. Models are available for closing on either the Series RL (medium duty) or SL (heavy duty) closures. The printed copy is applied to a small paper label that is attached to the plastic closure.

Models B and C utilize a band type printer for printing price, date and/or code information.

Models D and E utilize a block type printer, which hold 'grooved press-on' rubber type. Press-on type permits customizing of printed copy. Up to two lines of type is possible.

The machine can also close packages with Series R and S closures. However these closures cannot be printed.

The 1002FP is portable. Its suction cup feet allow it to be used on any clean flat surface. With bolt holes being pre-drilled it can be permanently mounted if desired (bolts are not included).

Series R (medium duty)
Series S (heavy duty)

Series RL (medium duty)
Series SL (heavy duty)
