

# V-SERIES OPTIONS

The V-Series consists of robust, reliable and user-friendly high capacity ovens. They are manufactured for professional users, with high standards for baking quality, efficiency and low total costs.

The V-Series is a flexible range of ovens with different options and settings to suit bakeries which create different types of goods in major volumes.

## V-SERIES OPTIONS

### 1. Rotating platform

Makes it possible to use the majority of racks. Made of stainless steel.

### 2. Automatic rack lifting

Motor driven hook that lifts the racks from the oven floor, making loading and unloading easier. This option means that the rack does not need to be lifted up onto a ramp or hook. The rack is placed on the floor, after which it is lifted and begins to rotate. Once baking is complete, the rack is automatically lowered to the floor of the oven so that it can be easily removed.

### 3. Variable fan speed

The fan speed is driven by a variable fan to maintain the desired flow of air.

### 4. Automatic evacuation system (AES)

An evacuation system that improves the working environment and safety in the bakery, as a fan is activated and vents hot air and steam when the door is opened.

### 5. Canopy

A large, solid canopy made of stainless steel. Effectively catches steam and heat when the oven door is opened. With exhaust fan for even better steam removal.

### 6. Sveba Connect Cloud Solution

A cloud service solution that allows complete control of baking 24/7, from any hardware and any location in the world.

### 7. Water filter

An effective filter that filters out dirt and limescale deposits, which gives the oven a longer life. Also gives the products a better taste and aroma.

## Dimensions

### V30

Width: 1810 mm

Height: 2425 mm

Depth: 1450 mm

Depth with canopy: 2150 mm

### V31/32

Width: 1915

Height: 2425 mm

Depth: 1450 mm

Depth with canopy: 2150 mm

### V40/41/42

Width: 2165 mm

Height: 2425 mm

Depth: 1700 mm

Depth with canopy: 2400 mm

### V50/51/52

Width: 2490 mm

Height: 2425 mm

Depth: 1975 mm

Depth with canopy: 2675 mm
