Donut Robot® Mark II  
(shown with Roto-Cooler  
available separately)

Belshaw Adamatic's Donut Robot® fryers deposit, fry, turn, and dispense cake donuts or mini donuts automatically. Training and labor requirements are substantially reduced while high quality, consistent donuts are produced time after time. Additionally, Donut Robot® fryers reduce oil absorption in comparison with kettle fryers. Donut Robots are fun to watch and always attract passers-by.

- Donut size is adjustable up to 3½" (90mm). Frying time and temperature can be changed easily. The Donut Robot® fries every donut for an equal amount of time, and the electronic controller maintains temperature very close to target (normally within 1°), resulting in more consistent product than available with standard fryers.

- Donut Robot® Mark II, Mark II GP, Mark V and Mark V GP are all-electric machines. All fryers are the same width. The Mark V's length and frying capacity are approximately 50% greater than Mark II.

- Mark II and Mark II GP are also available as gas heated models. For details, download [Donut Robot Mark II/Mark II GP Gas spec sheet](#).

- Donut Robot® Mark II, Mark II GP, Mark V, and Mark V GP are compatible with Belshaw Adamatic's 'Insider' Ventless donut system.

## FILTRATION

### OPTION 1: Filter Flo Siphon (DR42-1048) + Shortening Reserve Tank (MKV-1012)

- Simple and effective siphon for extracting shortening from the fryer. The filter at the bottom cleans the shortening as it drains. A metal leakproof container is required to hold shortening after it passes through the Filter-Flo.

### OPTION 2: Melter-Filter (EZMelt 18) + Drain (MK-0557-11.5)

- Filters shortening from the fryer, and pumps it back for re-use. Solid shortening can be melted in the filter. The internal heating element keeps shortening liquid at approximately 250°F (120°C). (A different drain is used with Belshaw support table)

## CAKE DONUTS

### Roto-Cooler (22104)

- Attractive, continuously rotating tray that collects donuts automatically after frying. Position it just off the end of the fryer and it works by itself.

### Mini donut kit (MK-1502-1)

- Includes hopper and double plunger, for depositing 4 mini donuts per conveyor row. Changeover from standard to mini donuts takes less than one minute.

## YEAST-RAISED DONUTS

### Support Table for Fryer (MK6-1005)

- Houses the Mark II or Mark V fryer, EZMelt 18 filtration system, and RL18 Rack Loader.
- With storage space for shortening, glaze, screens, and assorted items

### Support for Feed Table (FT6-1004)

- Stand for the FT42 Feed Table
- Storage space for Shortening, Glaze, Screens, Proofing Trays/Cloths, and assorted items.

### Feed Table (FT42)

- Accepts yeast-raised donuts on Proofing Trays/Cloths and drops them automatically into the fryer.

### Proofing Trays (FT42-0052) & Proofing Cloths (FT100-0532)

- Place donuts on a Proofing Cloth and Proofing Tray, allow to rise in proofer, then transfer onto the Feed Table. Minimum 20 trays / 25 cloths are recommended.

### Rack Loader RL18 (#86100)

- Allows donuts to slide off the end of the fryer and fill up a stack of Glazing Screens with 24 donuts per screen. The screens can then be used for glazing, icing, or storing in a rack.

### Glazing Screens (SL200-0004)

- Used with RL18 Rack Loader to sort and collect donuts. Can then be used for glazing, icing, or storing in a rack. Each screen holds 2 dozen donuts. Minimum of 20 screens are recommended

## ACCESSORY EQUIPMENT

### Glazer + Drain Tray: (HG18EZ + HG18EZ-1002)

- Glazes 2 dozen donuts at a time on a glazing screen. The glaze applicator is supported on rails.
- The drain tray allows excess glaze to drain, as you glaze the next screen of donuts

### Proofer (EP18/24 or TZ6)

- EP18/24. 17-shelf proofer with 6 doors
- Or TZ6. 6-shelf version with 2 doors, and a top that doubles as a work surface
- Capacity approximately 50 dozen donuts per hour (at a proofing time of 35-40 minutes).

### Icer (H&I-2 or H&I-4) or Donut Finishing Center

- H&I-2 / H&I-4: 2 or 4-bowl icers for hand dipping donuts. 13" bowls are warmed directly by heated water tank at 120-130°F (50-55°C), for the best possible icing condition for donuts.
- DFC: 3 air-warmed 1/3-size pans for icing, 4 unwarmed 1/4-size pans for sprinkles or other finishes + plenty of work and storage space.

### Autofiller Donut Injector (#20600)

- Jelly, jam, custard and creme injector for donuts and pastry
- Includes 6-quart capacity hopper, with 7/16" nozzles
- 5/16" nozzles optional for donut "holes"
- Designed specially for donuts
